

Francesca Arici

Mathematical Institute, Leiden University
✉ f.arici@math.leidenuniv.nl

Employment

Mathematical Institute, Leiden University, The Netherlands

Assistant Professor in Mathematics

Sep 2019 –

On parental leave January–May 2022

IMAPP Radboud Universiteit Nijmegen, The Netherlands

NWO VENI fellow

Apr – Aug 2019

Max Planck Institute for Mathematics in the Sciences, Leipzig, Germany

Postdoctoral Researcher

Jan – Mar 2019

Max Planck Institute for Mathematics in the Sciences, Leipzig, Germany

Researcher and Scientific Outreach Manager (on a part-time basis)

Feb - Dec 2018

IMAPP Radboud Universiteit Nijmegen, The Netherlands

Postdoctoral fellow in Mathematical Physics

Oct 2015 – Jan 2018

Education

SISSA, Trieste, Italy

Ph.D. in Mathematical Physics

awarded *cum laude*

2015

Title of the dissertation: *Principal circle bundles, Pimsner algebras and Gysin Sequences.*

Advisor: Prof. Giovanni Landi (Università degli Studi di Trieste)

Research

Research Interests.....

Operator algebras, noncommutative geometry, and mathematical physics.

Post Doc supervision.....

Dimitris Gerontogiannis

PostDoc in the Functional Analysis Group

2022-2024

Current position: Assistant Professor. IM PAN (Warsaw), Poland

Yeong Chyuan Chung

PostDoc in the Functional Analysis Group

2019-2022

Current position: Professor at Jilin University's School of Mathematics

PhD supervision.....

Matt Verhoeven

Topic: New K-theoretic invariants in quantum theory

starting September 2026

Prospective supervising team: I. Aguilera Bonet (UvA), F. Arici, B. Mesland

Max Schmidt

Topic: From Ideals to Quantum Spaces

since January 2026

Supervising team: F. Arici (copromotor) H.J. Hupkes (Promotor)

Yufan Ge

2021–2025

Dissertation title: Subproduct Systems and C*-algebras

Defended on 22/10/25

Supervising team: F. Arici (copromotor) D.M. Gerontogiannis (copromotor), M. de Jeu (Promotor)

Jack Thelin af Ekenstam

2020–2025

Topic: KK-duality for Cuntz–Pimsner algebras

Trajectory discontinued

Supervising team: F. Arici (copromotor), B. Mesland (copromotor), A. Doelman (Promotor)

Personal and collaborative grants.....

"Emergence at all scales", Project lead: Dr. J. Armas Co-applicant and WP coordinator
NWO NWA-ORC 2023 Consortium, Budget: 325k euro (1 PhD position) 2025-2030

"From ideals to quantum spaces" Principal Investigator
2024 NWO Vidi Grant, Budget: 850k euro. 2025-2029

"The noncommutative Geometry of Sphere Bundles" Principal Investigator
2018 NWO Veni Grant, Budget: 250k euro. 2019-2022

Travel grants.....

"Operator algebras that one can see" Node coordinator
European Commission HORIZON-MSCA Staff Exchanges 2021 2022–2026
International research exchange consortium designed to foster international collaboration through the temporary exchange of staff across borders (EU member states, associated countries, and third countries).

"Quantum Faserbündel und ihre C^* -Algebren"
DFG (German Research Foundation) Initiation of International Collaboration Grant 2018
Small seed-funding scheme to help researchers establish research partnerships, covering travel and visits.

Publications and preprints

Google Scholar Profile: <https://scholar.google.com/citations?user=cfJ93VwAAAAJ>

ORCID: <https://orcid.org/0000-0001-8326-6135>

A selection of preprints and peer-reviewed publications.....

[1]: Francesca Arici, Dimitris Michail Gerontogiannis, and Sergey Neshveyev, *KK-duality for the Cuntz-Pimsner algebras of Temperley-Lieb subproduct systems*, arXiv:2401.01725 (2024), 1–20. Preprint.

This paper establishes KK-self-duality for the Cuntz-Pimsner algebra of every Temperley-Lieb subproduct system. Currently under review.

[2]: Francesca Arici, and Yufan Ge, *Quadratic subproduct systems, free products, and their C^* -algebras*, Integr. Equ. Oper. Theory (2026) 98:19.

This work introduces the theory of quadratic algebras into the operator theoretic field of subproduct systems and has led to multiple invitations from the noncommutative function theory community.

[3]: Francesca Arici and Sophie E. Zegers, *Split extensions and KK-equivalences for quantum projective spaces*, Münster Journal of Mathematics (2023), no. 1, 1–24.

This article, tackling the noncommutative topology of quantum projective spaces, addresses a problem from two complementary viewpoints: the abstract theory of extensions and the more combinatorial graph algebra picture.

[4]: Asuman Güven Aksoy, Francesca Arici, M. Eugenia Celorrio, Pamela Gorkin, *Decomposable Blaschke products of degree 2^n* , Trans. Amer. Math. Soc. **376** (2023), no. 9, 6341–6369

Started during the Workshop Working Groups for Women in Operator Theory, the article concerns a question at the interface of operator theory, geometry, and group theory.

[5]: Francesca Arici, Francesco Galuppi, and Tatiana Gateva-Ivanova, *Veronese and Segre morphisms between non-commutative projective spaces*, Eur. J. Math. **8** (2022), suppl. 1, S235–S273.

This paper in algebra stems from an interdisciplinary collaboration with an algebraic geometer and a pure algebraist. The results of this work have been used in subsequent work by Gateva-Ivanova.

[6]: Francesca Arici, Francesco D'Andrea, Piotr M. Hajac, and Mariusz Tobolski, *An equivariant pullback structure of trimmable graph C^* -algebras*, J. Noncommut. Geom. **16** (2022), no. 3, 761–785.

This paper proves that the graph C^* -algebra $C^*(E)$ of a trimmable graph E is $U(1)$ -equivariantly isomorphic to a pullback C^* -algebra built from simpler subgraph algebras. The article represents a contribution to the broader research programme on equivariant pullback structures.

[7]: Francesca Arici and Jens Kaad, *Gysin sequences and $SU(2)$ -symmetries of C^* -algebras*, Trans. London Math. Soc. **8** (2021), no. 1, 440–492.

This work sets a first crucial step in the direction of using subproduct systems to study sphere bundles. It was awarded a top downloaded article certificate from Wiley.

[8]: Francesca Arici and Adam Rennie, *The Cuntz-Pimsner extension and mapping cone exact sequences*, Math. Scand. **125** (2019), no. 2, 291–319.

The paper explicitly relates the construction of exact sequences in KK-theory from the Cuntz–Pimsner extension to the mapping cone exact sequence from algebraic topology.

[9]: Francesca Arici, Daniel Becker, Chris Ripken, Frank Saueressig, Walter D. van Suijlekom, *Reflection positivity in higher derivative scalar theories*, J. Math. Phys. **59** (2018), 082302.

This article is the result of a collaboration with theoretical physicists and shows my ability to work in an interdisciplinary setting. Due to its applications, it has received a substantial number of citations.

[10]: Francesca Arici, Ruben Stienstra, Walter D. van Suijlekom, *Quantum lattice gauge fields and groupoid C^* -algebras*, Ann. Henri Poincaré **19** (2018), 3241–3266.

In this work, we investigate how to describe the limiting theory of the quantum lattice gauge theory through the C^* -algebra of the associated path groupoid.

[11]: Francesca Arici, Jens Kaad, Giovanni Landi, *Pimsner algebras and Gysin sequences from principal circle actions*, J. Noncommut. Geom. **10** (2016), 29–64.

In this work, we use a class of universal C^* -algebras to describe quantum principal circle bundles. The article connects the algebraic and analytical sides of NCG and has been well-received by the community.

[12]: Francesca Arici, Simon Brain, Giovanni Landi, *The Gysin Sequence for Quantum Lens Spaces*, J. Noncommut. Geom. **9** (2015), 1077–1111.

The Gysin sequence is a long exact sequence for the cohomology classes of sphere bundles over a base space. Here we provide a non-commutative version of this sequence for a class of algebras called quantum lens spaces.

[A selection of peer-reviewed Conference Proceedings.....](#)

[13]: Francesca Arici, Piotr M. Hajac, Mariusz Tobolski, *Associated noncommutative vector bundles over the Vaksman–Soibelman quantum complex projective spaces*, Banach Center Publications 120 (2020).

[14]: Francesca Arici and Bram Mesland, *Toeplitz extensions in noncommutative topology and mathematical physics*, Geometric Methods in Physics XXXVIII (2020), 3–29.

This review focuses on the use of NCG in mathematical physics. It has attracted the attention of various researchers, with a high number of downloads and citations especially for a proceedings paper.

[15]: Francesca Arici, Francesco D’Andrea, Giovanni Landi, *Pimsner algebras and circle bundles*, Operator Theory: Advances and Applications **252** (2016), 1–25.

This article offers an overview of the state of the art on quantum principal circle bundles, focusing on the connection between Hopf-Galois extensions and Cuntz–Pimsner algebras.

[16]: Francesca Arici, *Gysin exact sequences for quantum weighted lens spaces*, 2016 Matrix Annals, Matrix Book Series vol 1 (2018).

This paper describes in detail the structure and K-theory of quantum weighted projective spaces and quantum weighted lens spaces.

Teaching

Qualifications.....

Basis kwalificatie Onderwijs (BKO)

LLInC Leiden University

June 2024

Mathematics Curriculum.....

2024/2025–2025/2026: Master Colloquium, Master Mathematics

2025/2026: Lineaire Algebra 1, Bachelor Mathematics

2025/2026: Seminarium Presenteren en Communiceren, Bachelor Mathematics

2020/2021–2024/2025: Fourier Analysis, Bachelor/Master Mathematics (elective)

2024/2025: Wiskundige Structuren, Bachelor Mathematics

Service Teaching.....

2019/2020–2020/2021: Mathematical Reasoning, Leiden University College. Course on fundamentals of mathematics for Liberal Arts and Sciences (Global Challenges programme).

2021/2022–2024/2025: Elementary Practical Mathematics for non-mathematicians, Minor Quantitative Biology. Mathematics for non-mathematicians with a background in the exact sciences.

Master Students.....

Events

Since 2013, organiser of workshops in both national and international contexts, including events at the Max Planck Institute for Mathematics in the Sciences, the Lorentz Center, and the Hausdorff Center for Mathematics.

Future International Events.....

Workshop NSeaG2027

Lund University, Sweden

7–11 June 2027

Co-organisers: Joakim Arnlind (Linköping), Magnus Goffeng (Lund), Eva-Maria Ekkelman (Bonn), Kang Li (Lund), Stefan Wagner (BTH Karlskrona).

2027 edition of the international conference series Noncommutative Geometry Along the North Sea (NSeaG).

Workshop Synergies Between Jordan Theory and Operator Algebras

Lorentz Center Leiden

19–23 April 2027

Co-organisers: María Cueto Avellaneda (University of Murcia), Bas Lemmens (University of Kent), Mark Roelands (Leiden), and Samuel Tiersma (Leiden).

Interactive workshop that aims at reconnecting the Jordan theory and operator algebras communities.

Past International Events Co-organised.....

Indam Workshop on Noncommutative Geometry and Applications

Cortona, Italy

24–28 June 2024

Main organisers: Giovanni Landi (Trieste) and Alain Connes (IHES). Local co-organisers: F. D'Andrea (Napoli), D. Guido (Tor Vergata), S. Vassout (IMJ Paris).

INdAM workshop bringing together specialists in noncommutative geometry and its applications. Attended by about 60 participants.

Hausdorff School and Workshop NSeaG2023

Hausdorff Center for Mathematics, Bonn

2–12 May 2023

Co-organisers: Joakim Arnlind (Linköping), Sven Raum (Stockholm/Potsdam), Koen van den Dungen (Bonn).

Two-week event continuing the NSeaG (Noncommutative Geometry along the North Sea) series: a Hausdorff School (2–5 May) offering mini-courses on unbounded KK-theory, the Baum–Connes conjecture, quantum groups, and quantum metric spaces for early-career researchers, followed by a research workshop (8–12 May) for the exchange of recent developments in the field.

5th Conference de Settat on Operator Algebras and Applications

Université Hassan I, Marrakesh

9–13 January 2023

Co-organisers: Marcel de Jeu (Leiden), Rachid El Harti (Univ. Hassan I), Dimitris Gerontogiannis (Leiden), Yuezhao Li (Leiden).

Fifth edition of the international conference series on operator algebras, covering Banach $*$ -algebras and C^* -algebras, non-selfadjoint operator algebras, noncommutative geometry and index theory, abstract harmonic analysis, and C^* -dynamical systems. Supported by the Mathematical Institute of Leiden University, the GQT cluster, the Foundation Compositio Mathematica, and Université Hassan I.

Workshop Working Groups for Women in Operator Theory

Lorentz Center Leiden (virtual)

22–26 July 2021

Co-organisers: Fernanda Botelho (Memphis), Cristina Camara (Lisbon).

Workshop bringing together women in operator theory and related fields to collaborate on open research problems in small working groups, each led by expert project leaders. Aimed at building a lasting research network and increasing participation of women and early-career researchers in operator theory; supported by the AWM Research Collaboration Network for Women in Operator Theory.

Meeting of the German Chapter of EWM

Max Planck Institute for Mathematics in the Sciences, Leipzig (DE)

28–30 October 2019

Co-organisers: Tatjana Eisner (Leipzig), Barbara Gentz (Bielefeld), Angkana Rüland (MPI MiS), Rebecca Waldecker (Halle–Wittenberg), Milena Wrobel (Oldenburg).

Annual meeting of the German chapter of European Women in Mathematics, featuring seven plenary lectures across a broad range of mathematical fields, contributed talks, a poster session, and an evening event centred on the exhibition *Women of Mathematics throughout Europe*. Attended by 67 participants; hosted and supported by MPI MiS.

Workshop Noncommutative manifolds and their symmetries

Scalea (IT)

16–20 September 2019

Co-organisers: A. Connes (IHES), F. D’Andrea (Napoli), G. Dito (Dijon), C. Pagani (Trieste), W. van Suijlekom (Nijmegen).

Conference dedicated to Giovanni Landi on the occasion of his 60th birthday. Topics included noncommutative spaces and spectral triples, quantisation and deformations, noncommutative fibre bundles and gauge theories, Hopf algebras and quantum groups.

Workshop Cuntz–Pimsner cross pollination

Lorentz Center Leiden

25–29 June 2018

Co-organisers: Sara Arklint (Copenhagen), Karen Strung (Radboud), Elizabeth Gillaspay (Montana).

Workshop aimed at developing the general theory of Cuntz–Pimsner algebras by uniting diverse mathematical perspectives and facilitating a trans-generational transfer of knowledge. Advisory committee: A. an Huef, T. Katsura, S. Neshveyev, W. Szymański.

National Events Organised

Studiegroep Wiskunde met Industrie (SWI 2026)

Leiden University

26–30 January 2026

Co-organisers: A. Dürre, H.J. Hupkes, O. Kanavetas, V. Rottschäfer, E. Sertoöz, E. Verbitskiy (all Leiden University). NWO-sponsored week-long workshop in which roughly 70 mathematicians collaborate intensively on mathematical problems submitted by companies and other non-academic organisations. Part of the European Study Groups with Industry series, running since 1968.

Workshop on Noncommutativity Behind the Dunes

Delft University of Technology

28 October–1 November 2024

Co-organisers: M. Caspers (Delft), B. Mesland (Leiden), T. van Nuland (Delft), M. Vernooij (Delft), S. Zegers (Delft).

Workshop bringing together researchers from Leiden, Delft, and beyond, working on different aspects of noncommutative analysis and operator theory. Funded by NWO and the GQT cluster.

Workshop Noncommutative Geometry, Analysis and Topological Insulators

Leiden University

3–4 February 2020

Co-organiser: Bram Mesland (Leiden).

Workshop bringing together researchers in noncommutative topology and geometry, analysis of Schrödinger operators, and solid-state physics, with the aim of stimulating local interaction and exploring new collaborations at the interface between mathematics and physics.

Invitations to International Events

61th Sophus Lie workshop

Rome Tor Vergata (IT)

September 2025

Invited talk

Peer-to-peer Science Communication

SISSA Trieste (IT)

June 2025

Minicourse speaker

Workshop NSeaG 2025

ICMS Edinburgh (UK)

May 2025

Invited talk

Workshop NC function theory: The non-Commutative Frontier of Analysis and Algebra

Banff International Research Station (CA)

May 2025

Invited talk

Workshop Higher structures in Noncommutative Geometry and Quantum Algebra

Lille University (FR)

October 2024

Invited talk

Autumn school From T-duality via K-theory to representation theory

Goettingen University (DE)

October 2024

Lecture Series speaker

Workshop (Ode)NSeaG 2024 SDU Odense (DK) <i>Invited talk</i>	August 2024
YMC*A (Young Mathematicians in C*-algebras) 2024 Glasgow University (UK) <i>Lecture Series speaker</i>	August 2024
Workshop Geometry and Analysis of Quantum Groups Oslo University (NO) <i>Invited talk</i>	November 2024
Quantum Groups and Noncommutative Geometry in Prague Prague (CZ) <i>Invited talk</i>	September 2023
